I have a background in business, sales, and procurement and recently decided to switch to a career in programming. I am seeking an opportunity to apply the technical skills I've learned in the classroom and the practical knowledge I've learned in the business world to a rewarding job in the programming field.

PROJECT EXPERIENCE

St. Louis Restaurant Guide — MVC Restaurant Application
- Designed custom "to-visit" list that allows users to save and categorize a list of restaurants that they would like to visit.
- Created the ability for users to create and add restaurants to the application.
- Designed landing pages where users can view details about individual restaurants including address, reviews, etc.

WORK EXPERIENCE

Procurement Agent II, The Boeing Company, Maryland Heights, MO, August 2016 – September 2018
- Managed internal and external customers/suppliers to ensure timelines were met, quality was maintained, and contracts stayed within budget.
- Negotiated contracts that range in total value from $50, 000 to multimillion dollar product orders. Ensured all products were related to mission computing software / hardware..
- Trained team members on new policies by attending corporate training.
- Conducted competitive price analysis and thoroughly documented contracts.

Partner Sales Representative, Abstrakt Marketing Group, St. Louis, MO, November 2015 – August 2016
- Utilized a Pipeline Sales Solution to improve brand awareness and market size for multiple clients in diverse industries.
- Managed clients and generated leads via Salesforce.
- Assisted with team communication and morale via daily stand-ups..

Procurement Operations Support, Anheuser-Busch, St. Louis, MO, February 2015 – November 2015
- Communicated with internal and external clients.
- Generated procurement standardized reports, handled data entry and vendor creation in SAP, and supported procurement payment portal.
- Updated and maintained SOP (standard operating procedures) documents.
- Trained colleagues on procurement procedures.
